

# WHAT TYPE OF PACT?

## Some KEYWORDS

- **Intergenerational**
- **Eco-friendly**
- **Global**
- **Solidarity-driven**
- **Change-oriented**

**The Pact has not to be a piece of paper but need to suggest immediate actions!**

# AS ACTIONS WE PROPOSE: MICROPROJECTS

A Microproject is: a project of fast and simple implementation to respond immediately to basic needs, especially in countries with an economic disadvantage

# WHAT ARE BASIC NEEDS?

- FOOD?

- EDUCATION?

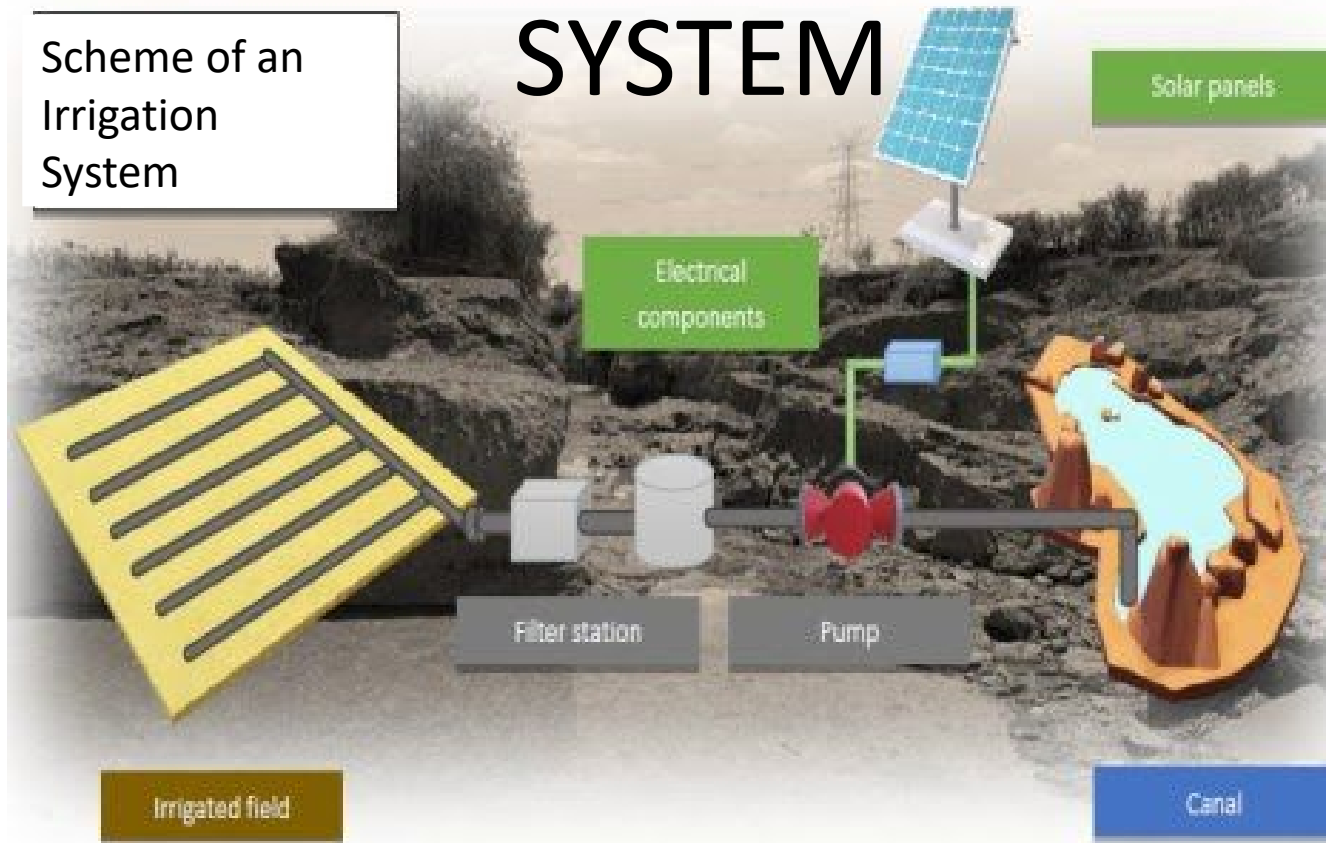

- HEALTH?

All of these examples and also many other need an **energy source**.

So we can say that the basic need is energy

# AN EXAMPLE OF MICROPROJECT: A SOLAR PUMPING IRRIGATION

# WE DO NOT THINK WITH WORDS LET'S PUT IN SOME NUMBERS...

- 1) The amount available from Europe-EU for the environment is 100 billions of euros in ten years. Assuming we allocate 10% (10 billion) to developing countries.
- 2) The local construction and training cost of a 50KW solar energy system is 500k euros and this covers a Village of about 5,000 people.

## ....AND SOME CALCULATIONS

10 billion euro of EU-Environmental Fund)

**divided by**

500k (cost of energy system for one Village)

**equal to**

20k Villages have an energy system

**We help a total of**

**100mln of people!!**
