ATOMS FOR PEACE

Priority to High level of Safety in civil nuclear peaceful applications

Philippe AUZIERE
President of WONUC

- ▶ **2011 was a trauma year for Japanese people and nuclear workers after this lethal tsunami and the human disaster in Japan.**
- ▶ **The international community supports the Japanese nuclear workers, by mobilizing nuclear experts worldwide and by following attentively the feedback experience of the FUKUSHIMA nuclear accident**

« Nuclear workers contribute to a high level of nuclear safety across all the nuclear facilities and plants worldwide »

Health of workers

We are all responsible of safety

- ▶ Each working day, nuclear workers are involved in safety as a priority in order to protect their health in the industrial plant
- ▶ Our target is ZERO ACCIDENT
- ▶ To reach ZERO ACCIDENT, nuclear workers request:
 - ◆ Integrate safety as a component of the job for all the workers
 - ◆ Put in place prevention especially through training

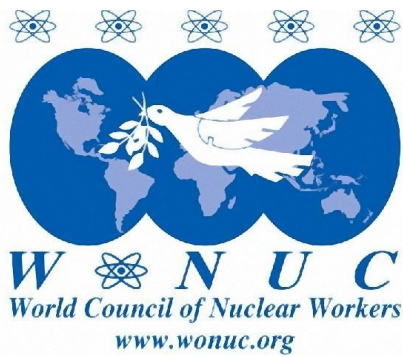

« Health is a precious asset for each human being »

Regulatory and safety policy

- ▶ **Need of an efficient independent regulatory and a safety policy on the work location:**
 - ◆ incorporate the regulatory and its developments in safety and radiological protection
 - ◆ Promote a strong safety culture to be shared between nuclear workers worldwide
 - ◆ Integrate nuclear safety in all processes

« Individual and collective actions and dialogues of nuclear workers are important keys of safety »

- ▶ **Nuclear safety is based on an important principle of high quality dialogue with internal and external workers and public with a commitment to continuous improvement**
- ▶ **Each nuclear worker has to be very attentive to safety of himself and his colleagues where ongoing review and sharing of experiences and lessons learnt are key drivers**
- ▶ **Each nuclear workers need to be sure that considerations of safety requirements are fully integrated by companies in the nuclear facilities where they work daily**

Training and skills

- ▶ **Nuclear workers need to develop their competencies within operational positions.**
- ▶ **Need to consolidate and improve safety through qualifications and through the reinforcement of training**
- ▶ **Need to ensure that considerations of safety requirements are fully integrated in the nuclear facilities where they work daily**

Conclusions

- ▶ **Energy is at heart of our lives and has to be accessible for all the human beings worldwide**
- ▶ **Nuclear energy peaceful application is a primary energy allowing to limit CO2 emissions harmful to our Earth**
- ▶ **The requirement to use nuclear energy is a strong priority: High level of nuclear safety**
- ▶ **Nuclear workers contributes daily to high level of nuclear safety in the industrial and Nuclear Power Plants**
- ▶ **Individual and collective actions, dialogues and training of nuclear workers are important keys of safety**

THANK YOU
